

Sai Sreeram Yadav Chavali

+91 9515545847 – chavalisaisreeramyadav@gmail.com – Bengaluru, Karnataka 560100
linkedin.com/in/sreeram0303 – github.com/Sreeram0303

SKILLS

Languages: Python, Java, SQL.

Web & Backend: ReactJS, FastAPI, REST APIs, SQLAlchemy, PostgreSQL, Redis, SSE (Server-Sent Events).

Infrastructure & Testing: Docker, GitHub Actions, Git, pytest.

AI/ML: Machine Learning, Deep Learning, Pandas, NumPy, Matplotlib, Seaborn, Plotly, TensorFlow, scikit-learn.

Agentic AI & Generative AI: LLMs (Large Language Models), RAG (Retrieval-Augmented Generation), MCP (Model Context Protocol), FastMCP, LangGraph, LangChain, A2A (Agent-to-Agent), HITL (Human-in-the-Loop).

EXPERIENCE

Specialist Programmer | Infosys

Aug 2025 – Present

Bengaluru, India

Telecom Order Fallout Automation | Enterprise Telecom Client

- Extended and maintained a Python/FastAPI automation platform for telecom order-fallout processing, analyzing Oracle/ServiceNow architecture, asynchronous workflows, SQL extraction logic, and ~40 unit/integration/API tests.
- Developed an intermediate automation workflow for scenario-based order-failure classification, conditional escalation workflows, and service-order validation through API integrations.

AI / Multi-Agent Systems

- Architected a distributed multi-agent A2A system where LangGraph workflows communicated with dedicated agent services, integrating RAG, Google ADK, and ChromaDB for enterprise data retrieval and compliance validation.
- Established persistent workflow state for human-in-the-loop execution and integrated observability to trace execution, diagnose latency and failure points, and improve reliability and auditability of distributed AI workflows.

Software Development Intern | LogicalAt

Oct 2023 – Nov 2023

Nashik, Maharashtra

- Applied machine learning algorithms including Linear Regression, KNN, Ridge, Lasso, and MultiOutput Regressor to enhance industrial color manufacturing processes while ensuring alignment with operational constraints and client specifications.
- Performed exploratory analytics and PCA-based feature engineering to refine dataset quality, boost predictive performance, and improve end-to-end machine learning effectiveness.

Research Intern | Vellore Institute of Technology

Aug 2023 – Sep 2023

Chennai, Tamil Nadu

- Fine-tuned an EfficientNetV2B0-based deep learning model for rice leaf disease recognition using accuracy, precision, recall, and F1-score for evaluation.
- Authored and published an IEEE research paper on rice leaf disease classification using deep learning. IEEE: ieeexplore.ieee.org/document/10722610

PROJECTS

TaskManager — Secure Async Task Management API

FastAPI · PostgreSQL · Redis · Docker · SQLAlchemy · GitHub Actions

- Designed a secure asynchronous task-management API using FastAPI, PostgreSQL, SQLAlchemy, and Redis, implementing JWT authentication, refresh-token rotation and reuse detection, CSRF protection, rate limiting, and role-based access control.
- Engineered asynchronous job processing, cache-aside data access, and real-time multi-device synchronization using Redis Pub/Sub and Server-Sent Events; containerized services with Docker Compose and automated CI through GitHub Actions.

LangGraph SQL Agent — Self-Correcting Query Validation

LangGraph · LangChain · Gemini AI · SQLite

- Engineered a stateful natural-language SQL assistant with schema inspection, query generation, validation, controlled execution, and cyclic self-correction workflows using LangGraph.
- Enforced safety guardrails and restricted DML operations to reduce unsafe query execution.

AI-Powered ServiceNow Operational Intelligence Platform

Dash · Plotly · Gemini AI · ServiceNow API

- Delivered an operational analytics platform integrating ServiceNow incident data with KPI, SLA aging, MTTR, lifecycle, and real-time dashboard workflows.
- Created a Gemini-powered natural-language chart exploration module that generated Plotly visualizations using schema-only context and restricted Python execution.

EDUCATION

Vellore Institute of Technology

Chennai, Tamil Nadu

B.Tech in Computer Science, specialization in AI & Robotics | GPA: 9.11

May 2025
